Answers Extend your knowledge 11.1

1 Factory workers, farmers, tradesmen

2 Denim, cotton

3 The cutting process for jeans:

- Several thicknesses of denim are unrolled onto a table
- An electric knife, which can cut through up to 100 layers, is used to cut around the pattern pieces
- Small pieces for example, pockets, are cut with a clipper or stamper

4 The steps involved in the construction of jeans:

- Embroidery
- Pockets
- Buttonhole/ button
- Belt loops
- Seams
- Zipper
- Belt/ waistband

5 12 minutes, 50 seconds
